Acid Reflux and GERD

Gastroesophageal reflux disease

About **1 in 5 U.S. adults** has GERD. At the bottom of your esophagus sits a ring of muscle, the **lower esophageal sphincter (LES)**. It opens to let food into the stomach and closes to keep it there. In GERD the valve relaxes when it should not, so acid and digestive enzymes splash back into a tube that has no protective lining against them. Heartburn is the most common sign. Others include:

- A sour taste or food coming back up
- Hoarse voice, throat clearing
- Chronic dry cough
- Trouble swallowing
- Bad breath
- Fullness or upset stomach after meals

CALL YOUR DOCTOR PROMPTLY IF

food sticks when you swallow, you vomit blood or see black stools, you lose weight without trying, or you have chest pain (never assume it is only heartburn).

Left alone, reflux can inflame and scar the esophagus. A digestive tract that stays irritated also affects how well you absorb nutrients, and that ripples into energy, immunity and mood.

About acid-reducing medicines. Proton pump inhibitors (omeprazole, esomeprazole, pantoprazole) and H2 blockers lower acid and help many people heal. With long-term use they are linked to low **magnesium** and **vitamin B12**, and the FDA has warned about low magnesium and bone fractures with long-term, high-dose PPI use.[1] Do not stop one on your own: ask your prescriber and pharmacist for a plan. Food, habits and targeted nutrients can lower how often reflux shows up.

1. U.S. Food and Drug Administration. Drug Safety Communications on proton pump inhibitors: possible increased risk of fractures (2010) and low magnesium levels with long-term use (2011).

Lifestyle Modifications

Close the kitchen early
Finish eating 3 hours before you lie down.

Raise the head
Lift the head of your bed 6 to 8 inches.

Smaller meals
Eat slowly and stop before full.

A healthy weight
Even a few pounds lighter eases pressure on the valve.

Know your triggers
Fried food, chocolate, mint, caffeine, alcohol, citrus, tomato, fizzy drinks.

Stop smoking
Smoking relaxes the valve and slows healing.

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

Coat and soothe
DGL, aloe, slippery elm, marshmallow, glutamine

START HERE

GI Integrity
About 28 servings · Peach Tea, Berry or Chocolate

- Sip it slowly so it coats your throat on the way down
- Zinc carnosine supports the stomach lining

IN EACH SERVING
3 g L-glutamine, 16 mg zinc (as zinc carnosine), 400 mg DGL, 300 mg aloe, 200 mg slippery elm, marshmallow, okra, no added sugar

1 scoop daily
sip over 10 minutes

Protect the stomach lining
zinc carnosine

Zinc-Carnosine
60 capsules

- Supports the stomach's natural mucosal defenses
- Studied for gastric comfort

IN EACH SERVING
75 mg zinc-carnosine complex: 17 mg zinc + 58 mg L-carnosine

1 capsule twice daily
between meals

Balance the gut
probiotic + S. boulardii

UltraBiotic Daily Multi-Strain
Practitioner exclusive

- Seven friendly strains
- Supports comfortable digestion

IN EACH SERVING
30 billion CFU, seven strains: S. boulardii, L. reuteri, B. lactis, L. plantarum, L. acidophilus, L. gasseri, B. coagulans

1 capsule daily
at bedtime

Refill magnesium
chelated magnesium

Magnesium Glycinate
60, 120, 160 or 320 capsules

- Acid blockers can drain magnesium
- Chelated forms are gentle on the stomach

IN EACH SERVING
260 mg magnesium per 2 capsules, Albion chelated (di-magnesium malate, lysinate glycinate)

2 capsules, 1 to 2 times daily
with food

Refill B12
active B vitamins

Methyl Complete
120 capsules

- Stomach acid is needed to absorb B12
- Methylated forms, ready to use

IN EACH SERVING
Per 2 capsules: 1 mg B12 (methyl + adenosyl), 800 mcg DFE folate as L-5-MTHF, 10 mg P5P, 700 mg TMG, 500 mg NAC

2 capsules daily
with breakfast

YOUR DAILY RHYTHM

Morning
GI Integrity 1 scoop
Zinc-Carnosine 1 capsule
Methyl Complete 2 capsules

Evening meal
Zinc-Carnosine 1 capsule

Bedtime
UltraBiotic Daily Multi-Strain 1 capsule
Magnesium Glycinate 2 capsules

The full plan is **7 pills and 1 scoop a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

PHARMACIST CHECK

- **PPIs and H2 blockers** can lower magnesium, B12, calcium and iron over time. Ask for levels once a year.
- **Take soothing powders 2 hours apart** from other medicines: coating herbs can slow their absorption.
- **Want to taper an acid blocker?** Plan it with your prescriber; stopping suddenly can bring a rebound.
