Patient name _____ Date _____

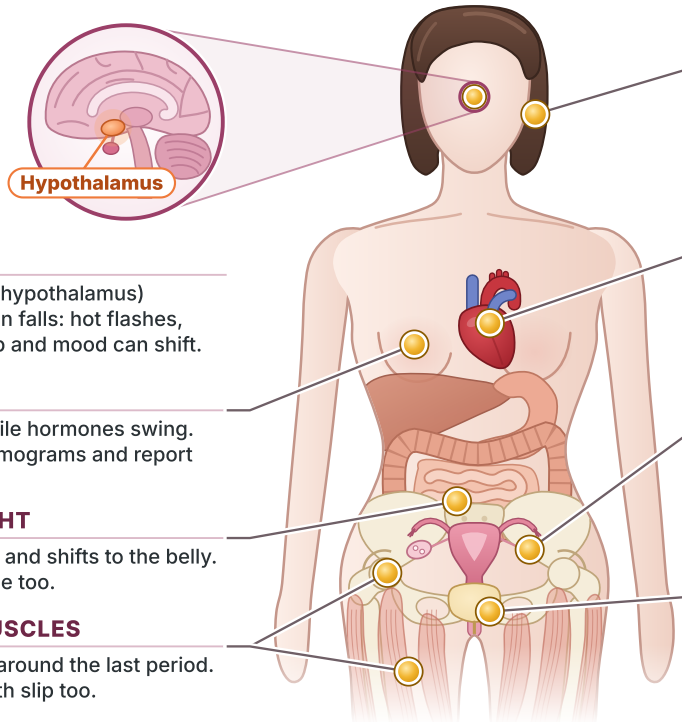

Menopause and Perimenopause

Every system changes. Every system can be supported.

Menopause is the day you reach **12 months in a row with no period**, on average around age 51. The years before it, **perimenopause**, often last 4 to 8 years while estrogen and progesterone swing, then fall. These hormones act on nearly every tissue, so changes show up from head to toe. **Hormone therapy is the most effective treatment for hot flashes**: ask your pharmacist if it fits you.

ONE WOMAN, EVERY SYSTEM

KEY
Where a change can show up

BRAIN
Its thermostat (the hypothalamus) misfires as estrogen falls: hot flashes, night sweats. Sleep and mood can shift.

BREASTS
Can feel tender while hormones swing. Keep up with mammograms and report any new lump.

GUT AND WEIGHT
Fat gain speeds up and shifts to the belly. Gut bacteria change too.

BONES AND MUSCLES
Bone thins fastest around the last period. Muscle and strength slip too.

SKIN AND HAIR
Less collagen, so skin gets thinner and drier. Hair can thin.

HEART AND VESSELS
LDL (bad) cholesterol tends to rise, so heart risk climbs. Know your numbers.

OVARIES AND UTERUS
Eggs run low, so hormones swing, then fall. Periods change, then stop. Any bleeding after that needs a check.

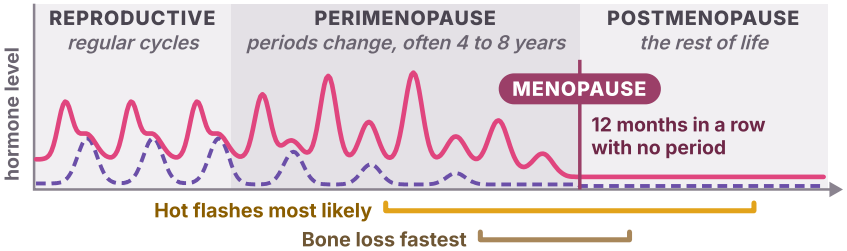

BLADDER AND VAGINA
Dryness, pain with sex, urgency and bladder infections. Common, and treatable.

WHY HOT FLASHES HAPPEN

Low estrogen shrinks the brain's comfort zone for body heat, so a small rise sets off a hot flash, often followed by chills.

HOW YOUR HORMONES CHANGE

KEY — Estrogen — Progesterone — Life stages — Comfort zone — Body heat — Hot flash

Track your symptoms

Circle **0** none, **1** mild, **2** some days, **3** most days.

Hot flashes	0 1 2 3	Poor sleep	0 1 2 3	Mood or anxiety	0 1 2 3
Vaginal dryness	0 1 2 3	UTIs (bladder)	0 1 2 3	Low sex drive	0 1 2 3
Weight change	0 1 2 3	Sore breasts	0 1 2 3	Headaches	0 1 2 3
Brain fog	0 1 2 3	Joint aches	0 1 2 3	Hair changes	0 1 2 3

Add them up. Bring this to your visit. **Today** ____ / 36 **In 6 weeks** ____ / 36

Hot flashes: what works best

1. **Hormone therapy works best.** For most healthy women under 60, the benefits outweigh the risks. Ask your pharmacist.
2. **Also proven:** CBT, clinical hypnosis and some prescriptions.
3. **Supplements** are not recommended for hot flashes. EstroG-100, in Menopause Support, helped in small trials; the newest was paid for by a supplement company.

Lifestyle Recommendations

Lift weights
Strength work 2 to 3 days a week guards muscle and bone.

Walk most days
150 minutes a week helps your heart, mood, sleep and weight.

Bone-smart plate
Protein at each meal and calcium foods like yogurt and greens.

Guard your sleep
Same bedtime, a cool dark room, less alcohol and late caffeine.

Try CBT
CBT and clinical hypnosis are proven to ease hot flashes.

Skip smoking
Smoking speeds bone loss and raises heart risk.

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

Menopausal comfort
EstroG-100, ashwagandha, black cohosh

START HERE

Menopause Support
90 tablets

- Supports comfort during hot flashes
- Still having periods? Use PeriMenopause Support instead: 500 mg EstroG-100, 500 mg ashwagandha, 100 mg milk thistle

IN EACH SERVING
500 mg EstroG-100 (three herbal root extracts), 250 mg ashwagandha root, 80 mg black cohosh root

1 tablet daily
with food, same time each day

Sleep and calm
magnesium, myo-inositol, L-theanine

Mag Calm Pro
About 60 scoops · Raspberry Lemon

- Supports relaxation and restful sleep
- Supports a healthy stress response and mood

IN EACH SERVING
200 mg magnesium (as malate), 2 g myo-inositol, 500 mg taurine, 100 mg L-theanine, 5 mg vitamin B6

1 scoop at bedtime
in 6 oz water; up to 2 a day

Bone strength
vitamin D3 with vitamins K2 and K1

D3 5000 with K2
60 softgels

- Supports calcium absorption for strong bones
- K2 helps put calcium to work in bone

IN EACH SERVING
5,000 IU (125 mcg) vitamin D3, 60 mcg vitamin K2 (MK-7), 15 mcg vitamin K1

1 softgel daily
with your evening meal

Healthy flora
women's probiotic, 9 strains

UltraBiotic Women's
60 capsules · 30 servings

- Supports a healthy vaginal microbiome
- Supports a healthy gut microbiome

IN EACH SERVING
25 billion CFU from 9 strains: 7 Lactobacillus and 2 Bacillus

2 capsules daily
same time each day

Muscle and strength
creatine monohydrate

Creatine Powder
505 g · about 100 scoops · unflavored

- Supports muscle and strength with strength training
- 5 g a day, the amount studied after menopause

IN EACH SERVING
5 g creatine monohydrate per scoop

1 scoop daily
in 8 to 16 oz of any drink

YOUR DAILY RHYTHM

Morning
Menopause Support 1 tablet
UltraBiotic Women's 2 capsules
Creatine Powder 1 scoop

Evening meal
D3 5000 with K2 1 softgel

Bedtime
Mag Calm Pro 1 scoop

The full plan is **4 pills and 2 scoops a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

PHARMACIST CHECK

- **Had breast cancer or another estrogen-dependent cancer?** The label says not to use Menopause Support. With black cohosh, stop if urine darkens or skin yellows.
- **Warfarin?** The vitamin K in D3 5000 with K2 can change your INR. **Thyroid, sedative or diabetes medicine?** Ashwagandha can add to it.
- **Space magnesium** 2 hours from bisphosphonates and some antibiotics. **Creatine** can raise the creatinine number on kidney labs.
