Patient name _____ Date _____

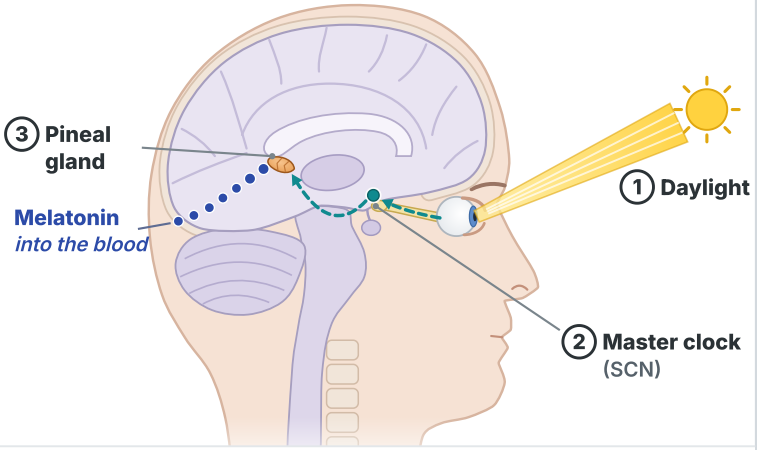

Better Sleep

When falling asleep or staying asleep is hard

Adults need **7 or more hours** of sleep, yet **more than 1 in 3** U.S. adults usually get less (CDC). **Insomnia** means trouble falling asleep, staying asleep, or waking too early, even with time to sleep. Sleep runs on a **body clock** in your brain: light sets it each morning, and the hormone **melatonin** tells your body that night has come.

YOUR BRAIN'S CLOCK

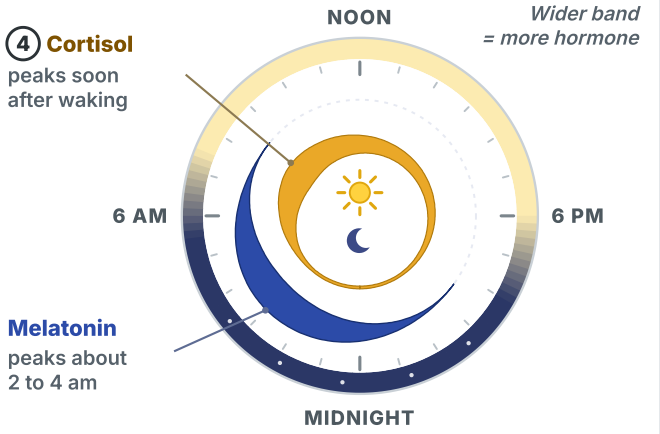

light in, melatonin out

1. Morning light reaches your eyes and sets your master clock.
2. As daylight fades, the clock signals the pineal gland.
3. The pineal gland releases melatonin, the body's night signal.

ONE DAY, TWO SIGNALS

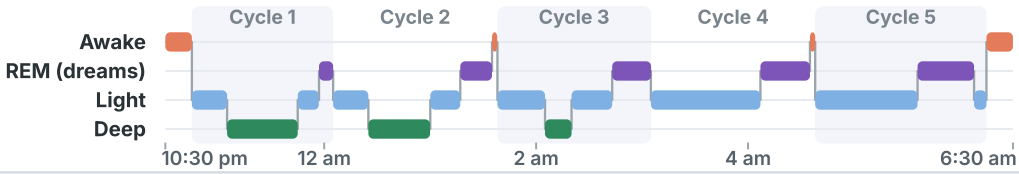

your 24-hour rhythm

4. Before dawn, melatonin fades and cortisol rises.
! Bright light late at night delays melatonin.
! Stress can keep cortisol up at bedtime.

ONE NIGHT OF SLEEP

you cycle through these stages about every 90 minutes

- Deep sleep comes mostly early in the night.
- REM (dream) sleep grows longer toward morning.
- Short wake-ups between cycles are normal.

KEY Daylight · Nerve signal · Melatonin · Cortisol · Awake · REM sleep · Light sleep · Deep sleep

WHAT GETS IN THE WAY OF SLEEP

- Caffeine late in the day
- Screens, bright light at night
- Alcohol close to bedtime
- Changing sleep schedules
- Stress and a racing mind
- Pain or hot flashes
- Loud snoring, sleep apnea
- Decongestants, some medicines

Know your sleep

Tick what fits you, then go over it with your pharmacist.

How much sleep?

Ages 18 to 60	**7+ hours**
Ages 61 to 64	**7 to 9 hours**
65 and older	**7 to 8 hours**

My usual _____ hours

Is it insomnia?

- ☐ Trouble falling or staying asleep, or waking too early
- ☐ 3 or more nights a week, for 3+ months
- ☐ Your days suffer: tired, moody or foggy

All 3? Ask about **CBT-I**, the short sleep-coaching program experts recommend first.

Sleep apnea check (STOP-Bang)

- ☐ **S** Snore loudly
- ☐ **O** Seen to stop breathing or gasp
- ☐ **B** BMI over 35
- ☐ **N** Collar 17 in+ (men), 16 in+ (women)
- ☐ **T** Tired or sleepy by day
- ☐ **P** High blood pressure, or pills for it
- ☐ **A** Age over 50
- ☐ **G** Male

3 or more ticks? Ask your pharmacist about a sleep apnea test.

Reset Your Sleep Clock

Habits from CBT-I, the first treatment sleep experts recommend for long-term insomnia

Morning: set the clock

- Get up at the same time every day, weekends too
- Get outdoor light within an hour of waking
- Rise on time, even after a rough night

Day: build sleep drive

- Have caffeine in the morning only
- Move your body most days
- Skip naps, or keep them short and early

Night: wind down

- Dim lights and put screens away an hour before bed
- No alcohol or big meals late in the evening
- Keep the bedroom cool, dark and quiet
- Awake 20 minutes? Get up until you feel sleepy

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

Ease into sleep
melatonin + calming herbs

START HERE

GoodNight
60 capsules · 30 servings

- Supports falling asleep and restful sleep
- Melatonin plus lemon balm, hops and valerian

IN EACH SERVING
Per 2 capsules: 5 mg melatonin, 500 mg L-tryptophan, 300 mg lemon balm, 200 mg L-theanine, 120 mg hops, 100 mg valerian, 40 mg vitamin B6

1 to 2 capsules
1 hour before bed

Relax body and nerves
magnesium

Magnesium Glycinate
60, 120, 160 or 320 capsules

- Helps maintain normal muscle and nerve function
- Supports relaxation at bedtime

1 scoop in 6 oz water
after dinner

Calm by day
L-theanine

L-Theanine Pro
60 capsules

- Supports calm focus without drowsiness
- Supports sleep quality

IN EACH SERVING
200 mg L-theanine per capsule

1 capsule
1 to 2 times a day

YOUR DAILY RHYTHM

Morning
L-Theanine Pro 1 capsule

Evening meal
Stress Essentials Calm 2 capsules
Mag Calm Pro 1 scoop

Bedtime
GoodNight 1 capsule
Magnesium Glycinate 2 capsules

The full plan is **6 pills and 1 scoop a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

PHARMACIST CHECK

- **Ask your pharmacist before GoodNight** if pregnant, nursing, or on SSRIs, SNRIs, MAOIs, triptans or sleep pills. Its tryptophan, melatonin and valerian add to them.
- **Loud snoring, gasping or sleepy days?** Your pharmacist can go over the apnea check on page 1. Apnea needs a sleep test; sleep aids do not treat it.
- **Both magnesium products together give 460 mg.** Check first with kidney disease. Ask how to space magnesium from thyroid, bone and antibiotic pills.
