Patient name _____ Date _____

# High Blood Pressure

## No symptoms, real risk

Nearly **half of U.S. adults** have high blood pressure, and many do not know it, because it rarely causes symptoms. Over the years, the extra force strains the heart, kidneys, brain and eyes and raises the risk of heart attack and stroke. One lever you control is **nitric oxide (NO)**, the signal that tells blood-vessel walls to relax. What you eat, how you move, how you sleep and how you handle stress all change how much of it your body makes.

**Leafy greens and beets**
bring in nitrate

↓

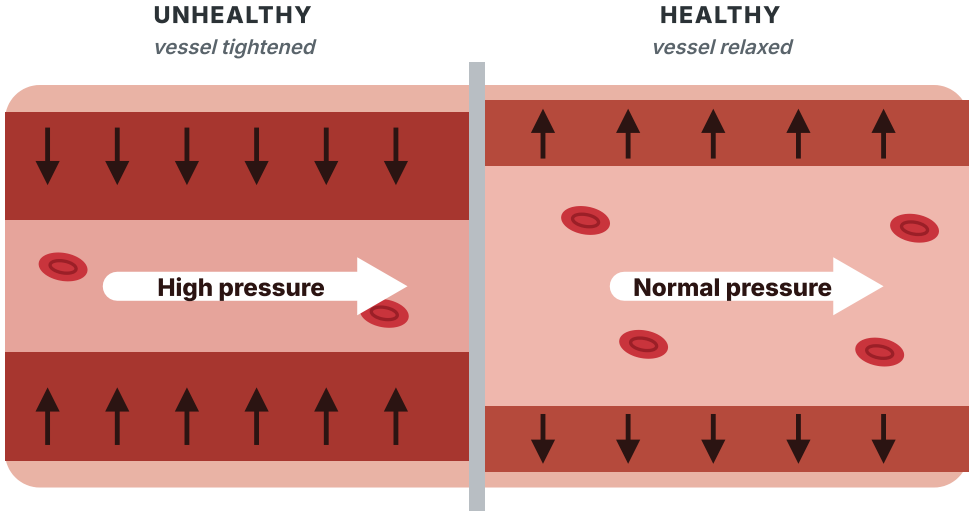

**Friendly mouth bacteria**
turn nitrate into nitrite

↓

**Your body turns nitrite**
into nitric oxide (NO)

↓

**NO relaxes vessel walls**
so pressure can ease

*Nitric oxide is the signal that tells vessel walls to relax.*

## RISK FACTORS

- Extra weight
- High-sodium, processed food
- Too much alcohol
- Smoking
- Chronic stress
- Poor sleep or sleep apnea
- Kidney disease
- Hormone changes
- Family history
- Increasing age

### Systolic
The top number: pressure on artery walls while the heart pumps.

### Diastolic
The bottom number: pressure between beats, while the heart rests.

### Measure it right
Sit 5 minutes, feet flat, back supported, arm at heart level. Take two readings a minute apart.

| Category | Top number (systolic) | | Bottom number (diastolic) |
|---|---|---|---|
| Normal | **under 120** | and | **under 80** |
| Elevated | **120 to 129** | and | **under 80** |
| Stage 1 high | **130 to 139** | or | **80 to 89** |
| Stage 2 high | **140 or more** | or | **90 or more** |
| **Severe: call your doctor** | **over 180** | and/or | **over 120** |

Categories from the American Heart Association and American College of Cardiology.

# Lifestyle Recommendations

### Eat for nitric oxide
Beets, arugula, spinach and celery bring nitrate. Load up on potassium-rich produce.

### Cut the sodium
Aim under 1,500 to 2,300 mg a day. Most hides in packaged and restaurant food.

### Move, then hold
Walk daily and add isometric holds (wall sits, hand grips) 3 times a week.

### Sleep and breathe
Sleep 7 to 9 hours. Loud snoring? Ask about sleep apnea.

### Quit smoking
Each cigarette tightens vessels. Keep alcohol low, too.

### Skip harsh mouthwash
Antiseptic rinses wipe out the mouth bacteria that help make NO.

# Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

## Relax vessel walls
magnesium

START HERE

**Magnesium Glycinate**
60, 120, 160 or 320 capsules

- Supports healthy vascular tone
- Supports healthy blood pressure already in a normal range

**IN EACH SERVING**
260 mg magnesium per 2 capsules, Albion chelated (di-magnesium malate, lysinate glycinate)

**2 capsules, 1 to 2 times daily**
with food

## Calm and balance
omega-3 fatty acids, EPA and DHA

**Omega Pure EPA-DHA 1000**
120 softgels

- Supports heart and vessel health
- Supports healthy triglyceride levels

**IN EACH SERVING**
1,000 mg EPA + DHA per softgel (730 mg EPA, 270 mg DHA)

**1 softgel daily**
with your evening meal

## Power the heart
CoQ10

**CoQ10 Ubiquinol**
30 softgels

- Fuel for heart-muscle cells
- Statins can lower CoQ10 levels

**IN EACH SERVING**
100 mg ubiquinol, the ready-to-use form of CoQ10, per softgel

**1 softgel daily**
with food

## YOUR DAILY RHYTHM

| Morning | Evening meal | Bedtime |
|---|---|---|
| CoQ10 Ubiquinol 1 softgel | Omega Pure EPA-DHA 1000 1 softgel | Magnesium Glycinate 2 capsules |

The full plan is **4 pills a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

## PHARMACIST CHECK

- **Diuretics** (HCTZ, furosemide) can drain magnesium and potassium. Ask about levels.
- **ACE inhibitors, ARBs and spironolactone** raise potassium: skip potassium pills and salt substitutes unless prescribed.
- **Beta blockers and statins** can lower CoQ10. Bring this sheet to your pharmacist.

**Special considerations for you:**
