# Inflammatory Bowel Disease

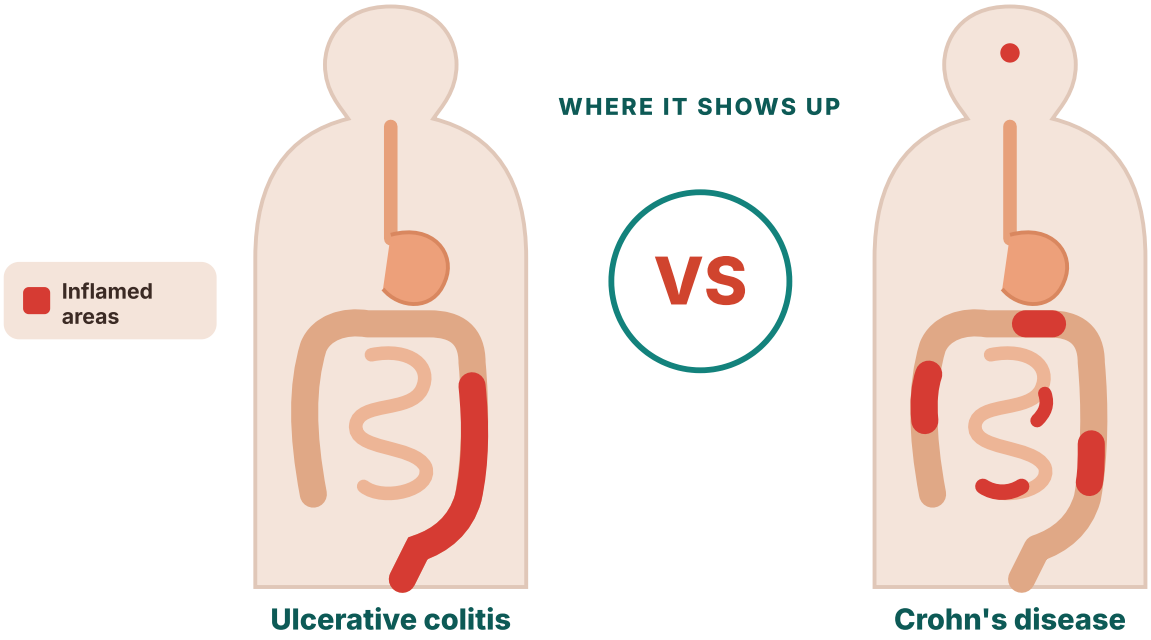

## Crohn's disease and ulcerative colitis

Inflammatory bowel disease (IBD) is a long-term condition in which the immune system keeps part of the digestive tract inflamed. About **3 million Americans** live with it. The two main types, **Crohn's disease** and **ulcerative colitis**, share belly pain, urgent diarrhea, fatigue and weight loss, with flares that can last weeks to months between quieter stretches. IBD is managed by a gastroenterologist. Food, lifestyle and nutrient support work alongside that care, never instead of it.

### WHAT CAN STIR UP SYMPTOMS

| STRESS | POOR SLEEP | ULTRA-PROCESSED FOOD | FOOD SENSITIVITIES | NSAID PAIN RELIEVERS | SMOKING | INFECTIONS |
|---|---|---|---|---|---|---|

### WHERE IT SHOWS UP

| Ulcerative colitis | | Crohn's disease |
|---|---|---|
| Colon and rectum only | WHERE | Anywhere from mouth to anus, most often the end of the small intestine |
| One continuous stretch, no gaps | PATTERN | Patches, with healthy tissue between them |
| Inner lining of the bowel | DEPTH | Can reach through the full thickness of the bowel wall |
| Often lower left belly | PAIN | Often lower right belly |
| Common with bowel movements | BLEEDING | Less common |

Both conditions raise colon cancer risk over time, so keep up with the **colonoscopy schedule** your gastroenterologist sets, even in good stretches.

# Lifestyle Modifications

### Find food triggers
Remove foods your care team identifies as a sensitivity or intolerance.

### Limit sugar
Sugar and ultra-processed food feed the wrong microbes.

### Eat enough
More protein and calories during flares, to protect weight and muscle.

### Lower stress
Stress is one of the most common flare triggers.

### Ask about NSAIDs
Ibuprofen and naproxen can trigger flares. Use antibiotics only when needed.

### Move gently
Regular low to moderate exercise.

# Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

## Rebalance the microbiome
high-potency probiotic

**UltraBiotic Daily Extra Strength**
Practitioner exclusive

- Supports a balanced gut microbiome
- Supports healthy bowel function

**IN EACH SERVING**
60 billion CFU per capsule, two strains at 30 billion each

**1 capsule daily**
at bedtime

## Inflammatory balance
curcumin

START HERE

**Curcumin 400X**
Practitioner exclusive · softgels

- Supports a healthy inflammatory response
- Enhanced-absorption curcumin

**IN EACH SERVING**
800 mg curcumin per 2 softgels, an enhanced-absorption form

**2 softgels daily**
with breakfast

## Vitamin D
D3 with K2

**D3 5000 with K2**
60 capsules

- Supports normal immune function
- Low vitamin D is common in IBD

**IN EACH SERVING**
5,000 IU vitamin D3, 60 mcg vitamin K2 (MK-7), 15 mcg vitamin K1

**1 capsule daily**
with your evening meal

## Repair the lining
L-glutamine, DGL, aloe

**GI Integrity**
About 28 servings · Peach Tea, Berry or Chocolate

- Fuel for the cells that line your gut
- Soothing botanicals

**IN EACH SERVING**
3 g L-glutamine, 16 mg zinc (as zinc carnosine), 400 mg DGL, 300 mg aloe, 200 mg slippery elm, marshmallow, okra, no added sugar

**1 scoop daily**
in 6 to 8 oz water

## Barrier and tolerance
serum-derived bovine immunoglobulins

**GI Defend**
Practitioner exclusive · powder

- Binds microbial toxins in the gut
- Supports barrier function

**IN EACH SERVING**
2.5 g ImmunoLin serum-derived bovine immunoglobulin per scoop

**1 scoop daily**
before breakfast

## YOUR DAILY RHYTHM

**Morning**
Curcumin 400X 2 softgels
GI Integrity 1 scoop
GI Defend 1 scoop

**Evening meal**
D3 5000 with K2 1 capsule

**Bedtime**
UltraBiotic Daily Extra Strength 1 capsule

The full plan is **4 pills and 2 scoops a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

## PROVIDER CHECK

- **Steroids** (prednisone, budesonide) lower vitamin D and calcium. Ask about bone health.
- **Sulfasalazine and methotrexate** lower folate. Ask whether you need a folate supplement.
- **Never stop IBD medicine** during a good stretch without your gastroenterologist. Ask before any new supplement.
