Mold Illness

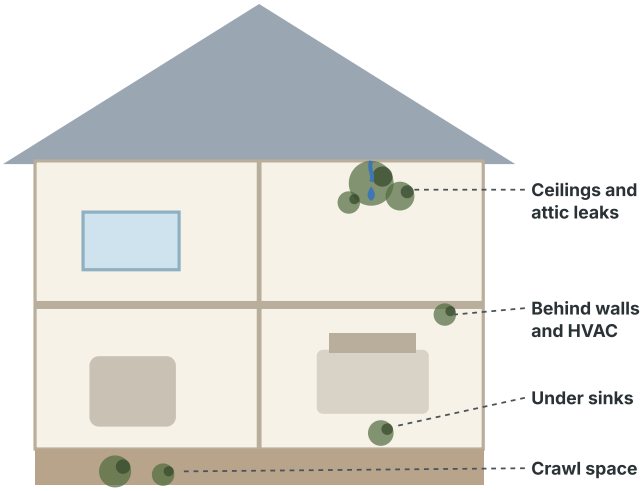

Mycotoxin exposure and recovery

Mold grows wherever water lingers: a slow roof leak, a damp crawl space, a sweating HVAC line. Some molds release **mycotoxins** and other irritants into the air you breathe. Damp, moldy buildings are linked with coughing, wheezing and asthma flares, and many people also report fatigue, headaches, joint aches and brain fog. Because the symptoms are so broad, mold is easy to overlook. Recovery starts with removing the exposure; only then does supporting the body's clearance make sense.

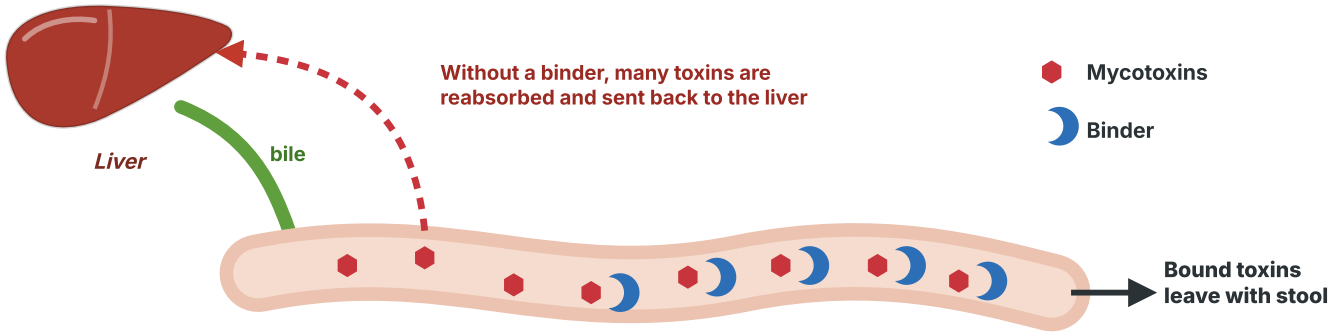

Fatigue | Joint aches | Inflammation | Brain fog | Headaches | Sinus congestion | Cough or wheeze

YOUR RECOVERY, IN ORDER

1. **Remove the exposure**
   Find and fix the moisture first. A qualified inspector can test (ERMI or HERTSMI-2 dust tests are common). Check ceilings, crawl spaces, under sinks, HVAC and any water damage.
2. **Support liver and bile flow**
   Your liver packages toxins into bile for removal.
3. **Support the gut and elimination**
   Fiber and binders carry toxins out instead of letting them recirculate.
4. **Address the sinuses**
   Sinuses can hold on to mold long after you leave the building.
5. **Treat fungal overgrowth if found**
   Only when your practitioner confirms it.

WHY BINDERS MATTER

Lifestyle Recommendations

Limit moldy foods
Peanuts, corn, long-stored grains, dried fruit, wine and aged cheese carry more mycotoxins.

More fiber
Fiber binds toxins carried in bile. Aim for 30 g a day.

Dry the air
Keep indoor humidity between 30 and 50 percent with a dehumidifier.

Filter it
HEPA air purifiers and HEPA vacuums trap mold spores.

Sweat
Sauna or a good workout helps you sweat. Drink water.

Fix fast
Dry or repair any leak within 24 to 48 hours.

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

Bind toxins in the gut
serum-derived bovine immunoglobulins

START HERE

GI Defend
Practitioner exclusive · powder

- Immunoglobulins bind microbial toxins in the gut
- Supports barrier function

IN EACH SERVING
2.5 g ImmunoLin serum-derived bovine immunoglobulin per scoop

1 scoop daily
before breakfast

Keep bile flowing
liver and bile support

Lipo-Flow
Practitioner exclusive · tablets

- Supports healthy bile flow
- Supports the liver's clearance pathways

IN EACH SERVING
Lipotropic liver formula with 200 mg beet root per 2 tablets

2 tablets with meals
up to 3 times daily

Master antioxidant
liposomal glutathione

Liposomal Glutathione
Liquid

- Supports the liver's detox pathways
- Liposomal form for absorption

IN EACH SERVING
100 mg glutathione per 1 mL dropper, liposomal for absorption

1 dropper, 2 to 4 times daily
shake well

Cellular energy and glutathione
NAC, carnitine, ALA

Mito Recharge
90 capsules

- Supports mitochondria and detoxification
- Antioxidant support

IN EACH SERVING
Per 3 capsules: 200 mg acetyl-L-carnitine, 100 mg NAC, 45 mg R-lipoic + 75 mg alpha lipoic acid, 100 mg resveratrol, 100 mg EGCG

3 capsules daily
with breakfast

Build glutathione
N-acetyl-L-cysteine

NAC-600
60 capsules

- The building block your body uses to make glutathione
- Supports respiratory health

IN EACH SERVING
600 mg N-acetyl-L-cysteine per capsule, the building block of glutathione

1 capsule daily

YOUR DAILY RHYTHM

Morning
GI Defend 1 scoop
Lipo-Flow 2 tablets
Liposomal Glutathione 1 dropper
Mito Recharge 3 capsules
NAC-600 1 capsule

Evening meal
Lipo-Flow 2 tablets
Liposomal Glutathione 1 dropper

Bedtime
nothing

The full plan is **8 pills and 1 scoop a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

PHARMACIST CHECK

- **Binders block absorption.** Take them 2 hours apart from food, supplements and every medicine.
- **Antifungal drugs,** if prescribed, interact with many medicines. Have your pharmacist review your list.
- **Stay regular.** Binders need a daily bowel movement to work. Constipated? Call your practitioner.
