Patient name _____ Date _____

Fatty Liver Disease

MASLD, the condition formerly called NAFLD

Fatty liver disease means extra fat is stored inside liver cells. In 2023, liver specialists named the most common kind **MASLD** (metabolic dysfunction-associated steatotic liver disease) because it goes hand in hand with insulin resistance, belly fat, high triglycerides and high blood pressure. This kind is **not caused by heavy drinking**. It is the most common liver condition in the world, affecting about **1 in 3 adults**, and most people feel nothing. Caught early, it is often reversible.

HOW FATTY LIVER PROGRESSES

WHAT RAISES YOUR RISK

- Sugary drinks, added sugar
- Insulin resistance or diabetes
- Weight carried at the belly
- High blood pressure
- High blood fats (triglycerides)
- PCOS (polycystic ovary syndrome)
- Family history and genes
- Gut imbalance (being studied)

ASK ABOUT LIVER CHECKS

You may feel fine. Ask your pharmacist which checks fit you; your doctor can order them.

1 Liver enzymes (ALT, AST)

A routine blood test. High levels can mean the liver is irritated, but normal levels do not rule out fatty liver.

- Healthy ALT, women: up to 25 U/L
- Healthy ALT, men: up to 33 U/L

2 FIB-4 score

Worked out from your age and routine labs (ALT, AST, platelets) to estimate the risk of advanced scarring.

- Under 1.3: low risk
- 1.3 or higher: a FibroScan is next

3 FibroScan (elastography)

A no-needle scan that measures liver stiffness (scarring) and estimates liver fat. The next step if FIB-4 is 1.3 or higher.

- Under 8 kPa: low risk
- 8 kPa or more: see a liver specialist

Two or more metabolic risks, like prediabetes or belly fat? Check FIB-4 every 1 to 2 years.

AASLD practice guidance, 2023

Lifestyle Recommendations

Eat Mediterranean
Vegetables, beans, olive oil, nuts and fish. Skip sugary drinks and sweets: sugar easily turns into liver fat.

Lose extra weight
Extra weight? Losing 5% cuts liver fat; 7–10% calms inflammation; 10% or more eases scarring.

Move every day
150 minutes a week of brisk walking plus 2 strength days. A 10-minute walk after meals blunts the sugar spike.

Feed your gut
Fiber and colorful plants feed helpful gut bacteria, like Akkermansia, that help keep the gut lining strong.

Less alcohol, or none
Even if alcohol did not cause this, it adds to the liver's load. Less is better; none at all if there is scarring.

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

START HERE

Steady blood sugar, blood fats
berberine (as dihydroberberine)

Berberine Pro
90 capsules

- Supports healthy glucose metabolism ◆
- Supports lipid levels already in a normal range ◆

IN EACH SERVING
Per capsule: 100 mg dihydroberberine (GlucoVantage) + 84 mg organic Ceylon cinnamon bark extract

1 capsule 3 times daily
before meals

Liver and bile support
artichoke, citrus peel, inositol

Lipo-Flow
180 tablets

- Supports healthy fat metabolism ◆
- Supports healthy bile flow ◆

IN EACH SERVING
2 tablets: 400 mg artichoke, 250 mg dandelion, 200 mg beet, 150 mg inositol, 100 mg each of tangerine, gentian, taurine, methionine

2 tablets 3 times daily
with meals

Antioxidant liver support
milk thistle (silymarin), NAC

Milk Thistle Complex
60 capsules

- Promotes healthy liver function ◆
- Supports the liver's natural detox processes ◆

IN EACH SERVING
Per capsule: 375 mg milk thistle extract (80% silymarin), 300 mg silymarin, 50 mg NAC, 25 mg each of turmeric and artichoke

1 capsule twice daily
morning and evening

Help cells make energy
alpha-lipoic acid, CoQ10, NAC

Cellular Energy
60 capsules

- Supports energy production ◆
- Provides antioxidant support ◆

IN EACH SERVING
2 capsules: 300 mg acetyl-L-carnitine HCl, 300 mg NAC, 200 mg CoQ10, 150 mg alpha-lipoic acid, 150 mg grape seed extract

2 capsules daily
at breakfast

YOUR DAILY RHYTHM

Breakfast and lunch
Berberine Pro 2 capsules: 1 before breakfast, 1 before lunch
Lipo-Flow 4 tablets: 2 at breakfast, 2 at lunch
Milk Thistle Complex 1 capsule at breakfast
Cellular Energy 2 capsules at breakfast

Evening meal
Berberine Pro 1 capsule before dinner
Lipo-Flow 2 tablets at dinner
Milk Thistle Complex 1 capsule

The full plan is **13 pills a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

PHARMACIST CHECK

Keep taking your medicines.

- **Diabetes medicines:** Berberine Pro (and, more mildly, the alpha-lipoic acid in Cellular Energy) may lower blood sugar along with them. Ask your doctor before you start, and check your blood sugar more often.
- **Statins, warfarin and other medicines:** Berberine Pro can slow the enzymes that clear some drugs (CYP2D6, 2C9, 3A4), including warfarin, simvastatin, lovastatin and atorvastatin, and the CoQ10 in Cellular Energy may change how warfarin works. Show your pharmacist your full medicine list; your doctor may recheck your INR (a clotting test) after you start.
- **Pregnant, planning to be, or nursing?** Ask your pharmacist before taking any of these, and skip Berberine Pro unless your doctor says otherwise.
- **Gallstones, a blocked bile duct, or a ragweed or daisy allergy?** Ask your pharmacist or your doctor before Lipo-Flow (it boosts bile flow) and Milk Thistle Complex.
