Patient name _____ Date _____

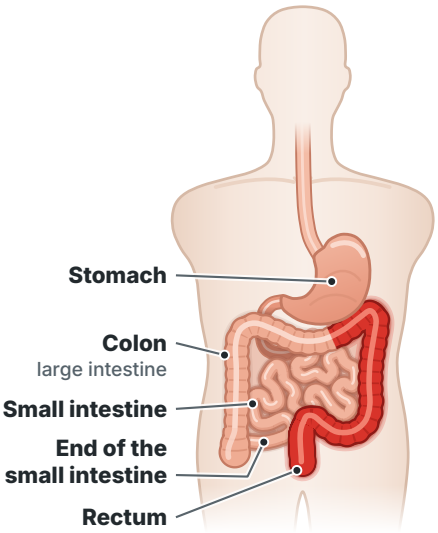

Inflammatory Bowel Disease

Ulcerative colitis and Crohn's disease

Inflammatory bowel disease (IBD) is a long-term condition in which the immune system keeps part of the digestive tract inflamed. **More than 2 million Americans** live with it. The two main types, **ulcerative colitis** and **Crohn's disease**, share belly pain, urgent diarrhea, tiredness and weight loss, with flares that come and go between quieter stretches. A gastroenterologist leads the care. Food, lifestyle and nutrient support work alongside that care, never instead of it.

WHERE THE INFLAMMATION IS

Ulcerative colitis

One unbroken stretch of inflammation that starts in the rectum and climbs the colon.

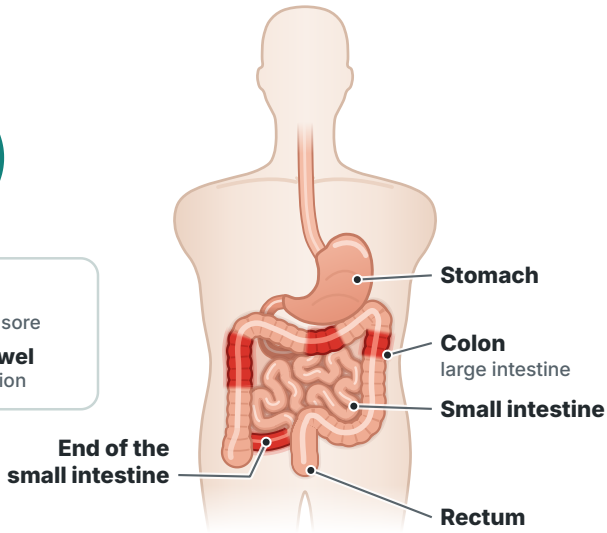

VS

KEY

Inflamed red, swollen, sore

Healthy bowel no inflammation

Crohn's disease

Patchy inflammation with healthy gaps, most often at the end of the small intestine.

Ulcerative colitis		Crohn's disease
Colon and rectum only	WHERE	Anywhere from mouth to anus, most often the end of the small intestine
The inner lining of the bowel	DEPTH	Can go through the whole bowel wall
Uncommon	FISTULAS	Can form: tunnels to the skin or another organ
Often the left side of the belly	PAIN	Often the lower right belly
Common, with bowel movements	BLEEDING	Less common

WHAT CAN STIR UP A FLARE

- STRESS
- POOR SLEEP (CROHN'S)
- TRIGGER FOODS
- NSAID PAIN RELIEVERS
- ANTIBIOTICS
- GUT INFECTIONS
- SMOKING (CROHN'S)
- MISSED MEDICINE

NUTRIENTS THAT OFTEN RUN LOW IN IBD

More than half of people with IBD run low on at least one vitamin or mineral, more often in Crohn's and during flares.

- **Fe** — **Iron** lost with bleeding
- **D** — **Vitamin D** less sun and poor absorption
- **B12** — **Vitamin B12** absorbed at the end of the small intestine
- **B9** — **Folate** lowered by some IBD medicines
- **Zn** — **Zinc** lost with diarrhea

Ask your pharmacist or doctor whether a nutrient blood test makes sense for you.

Years of colon inflammation raise colon cancer risk: keep every **colonoscopy**, even in good stretches.

Lifestyle Modifications

Keep every prescribed IBD medicine; your gastroenterologist leads. These steps and nutrients work alongside that care.

Mediterranean
Fish, olive oil and lots of vegetables; less sugar and processed food.

Spot triggers
Skip gluten, dairy and soy for 10 days, then add back one at a time.

Flare days
Small meals with protein. Cook or blend produce if raw hurts.

Lower stress
10 calm minutes and a gentle walk daily. Stress can stir up flares.

Smoke-free (Crohn's)
Smoking makes Crohn's worse. Get help to quit.

Skip NSAIDs
Ibuprofen and naproxen can trigger flares. Ask what to take instead.

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

START HERE

Inflammatory balance
turmeric shake, days 1 to 10

Inflam-Eze
Canister · 14 servings · 2 flavors

- Supports a healthy inflammatory response ◆
- Mix in 8 oz water; drink within 10 minutes

IN EACH SERVING
400 mg turmeric root extract, 500 mg quercetin, 200 mg ginger root extract, 2.5 g L-glutamine

1 scoop twice daily
days 1 to 10 · 2 canisters

Gut immune support
antibodies from cow serum

GI Defend
75 g unflavored powder

- Supports a healthy gut immune system ◆
- Supports gut barrier function ◆

IN EACH SERVING
2.5 g ImmunoLin (serum-derived bovine immunoglobulin), from cow serum, not milk

1 scoop twice daily
days 1 to 10, in Inflam-Eze

Gut lining support
L-glutamine and aloe shake

GI Restore
14 servings · 2 flavors

- Supports the gut lining and its mucus layer ◆
- Feeds your friendly gut bacteria ◆

IN EACH SERVING
2.5 g L-glutamine, 18.75 mg zinc, 200 mg NAC, 400 mg aloe, 200 mg slippery elm, 2.5 g larch arabinogalactan

1 scoop twice daily
from day 11, in 8 oz water

Microbiome balance
3 strains, with S. boulardii

UltraBiotic Defense
30 capsules

- Supports a balanced gut microbiome ◆
- Take it 2 hours away from antibiotics

IN EACH SERVING
5.5 billion CFU S. boulardii, 3 billion B. lactis, 1 billion L. rhamnosus HN001

1 capsule daily
at bedtime

Vitamin D support
D3 with K2

D3 5000 with K2
60 softgels

- Supports healthy vitamin D levels ◆
- Supports bone and immune health ◆

IN EACH SERVING
5,000 IU vitamin D3, 60 mcg vitamin K2 (MK-7), 15 mcg vitamin K1

1 softgel daily
at dinner · check your level

YOUR DAILY RHYTHM

Morning
Inflam-Eze
1 scoop to day 10
GI Defend
1 scoop to day 10
GI Restore
1 scoop from day 11

Evening meal
Inflam-Eze
1 scoop to day 10
GI Defend
1 scoop to day 10
GI Restore
1 scoop from day 11
D3 5000 with K2
1 softgel

Bedtime
UltraBiotic Defense
1 capsule

Days 1 to 10: **2 pills and 4 scoops a day**. From day 11, GI Restore is the only shake: **2 pills and 2 scoops**. Overwhelmed? Start with the **Start here** shake; ask your pharmacist when to add the rest.

PHARMACIST CHECK

Keep taking your medicines.

- **Steroids** (prednisone, budesonide) can thin bones and are linked to low vitamin D. **Sulfasalazine and methotrexate** lower folate: ask about folic acid.
- **Vitamin D:** with the shakes, vitamin D is 5,800 IU a day (upper limit 4,000 IU): keep D3 5000 with K2 short term and ask your doctor to check your level.
- **Looser stools on days 1 to 10?** Inflam-Eze gives 520 mg of magnesium a day (supplement limit 350 mg): tell your pharmacist before you count it as a flare.
- **On warfarin or another blood thinner?** Skip D3 5000 with K2, and ask your pharmacist before the shakes: both have turmeric.
- **On ciprofloxacin, levofloxacin or doxycycline?** Take it 2 hours before or 6 hours after a shake: the shake's calcium, magnesium, zinc and iron block it.
- **Weak immunity or a central IV line?** Many IBD medicines calm the immune system: ask your pharmacist before UltraBiotic Defense, whose S. boulardii is a live yeast.
- **Pregnant or nursing?** Ask your pharmacist before you start any of these.
- **Beef or red-meat (alpha-gal) allergy?** Skip GI Defend, and ask your pharmacist before D3 5000 with K2: its softgel shell is gelatin.
- **Smoker or ex-smoker?** Ask your pharmacist before GI Restore: it is high in beta-carotene, which raised lung cancer risk in smokers.
- **Fever, heavy bleeding or a flare that won't settle?** Call your gastroenterologist right away, or go to the emergency room.
