Healing After Injury

Sprains, strains, whiplash and recovery from surgery

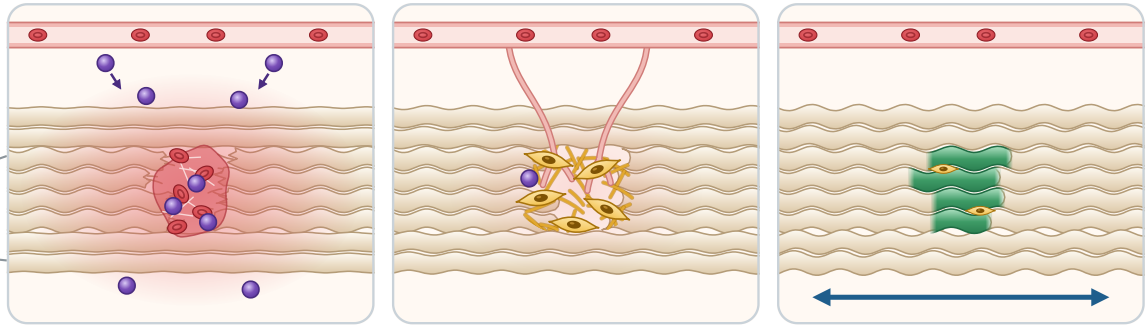

A **sprain** hurts a ligament, which ties bone to bone. A **strain** hurts a muscle or the tendon that ties it to bone. After a sprain, strain, whiplash or surgery, the body heals in three overlapping phases. **Inflammation** comes first, and it is part of healing. Then repair cells lay down new **collagen**, the rope-like protein of ligaments and tendons. Over months, the patch is **remodeled** and grows stronger. How you eat, sleep and move helps each phase.

THE THREE PHASES OF HEALING

WHIPLASH

A crash snaps the head back (dashed outline), then forward. Neck ligaments and muscles overstretch.

1 INFLAMMATION — Days 0 to 7

The tear bleeds and a clot forms. Swelling and immune cells move in to clean up.

You may feel: swollen, warm, sore

YOUR PART Protect it.
Gentle motion as advised.

2 REPAIR — Day 2 to a few weeks

Repair cells (fibroblasts) lay down new collagen in a loose criss-cross. New vessels sprout.

You may feel: less pain, still weak

YOUR PART Move it gently.
Easy, pain-free range.

3 REMODEL — Week 3 to a year or more

Steady pull lines the new fibers up, so the patch grows stronger over many months.

You may feel: stiff, but stronger

YOUR PART Load it.
Keep up your exercises.

KEY

- Ligament fibers
- Red blood cell
- Lined-up new fibers
- Magnified spot
- Swelling (inflammation)
- Immune cell, moving in
- Pull of movement
- Blood clot
- Fibroblast (repair cell)
- Neck bones and disc
- Blood vessel, new sprouts
- New collagen
- Spinal cord

Times on the ribbon are typical. Bigger injuries and surgery take longer.

WHAT CAN SLOW HEALING

- Smoking or nicotine
- Short or poor sleep
- Too little protein
- High blood sugar
- Alcohol
- Ongoing stress
- Too much rest
- Too much, too soon

GET CARE RIGHT AWAY

Healing should get a little better week by week. Some signs cannot wait.

CALL 911 NOW

- **Chest pain** or sudden trouble breathing
- **Stroke signs:** face drooping, a weak or numb arm or leg, trouble speaking or seeing, severe dizziness, or a sudden, severe headache or neck pain
- **After a crash or blow to the head:** passing out, a seizure, a worsening headache, repeated vomiting, confusion or unusual sleepiness
- **New weakness or numbness** with loss of bladder or bowel control

CALL YOUR DOCTOR THE SAME DAY

- **Calf pain or swelling** in one leg
- **Fever,** or redness, warmth or cloudy drainage at a surgery cut
- **Numbness or tingling** that builds slowly
- **Pain or swelling getting worse** instead of better, or you cannot put weight on it

Lifestyle Recommendations

Protein every meal
Fish, eggs, chicken or beans, a palm-size portion.

Vitamin C every day
Oranges, kiwi and peppers help you make collagen.

Sleep 7 to 9 hours
Short sleep slows repair. Keep a steady bedtime.

Move as advised
Gentle motion early, then exercises that line fibers up.

Skip smoking
Smoking starves tissue of oxygen. Go easy on alcohol.

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

START HERE

Inflammation balance
ginger, curcumin, boswellia + 3 herbs

Inflam-Eze Plus
90 or 180 capsules

- Supports a healthy inflammatory response ◆
- Supports joint and muscle comfort ◆

IN EACH SERVING
Per 3 capsules: 800 mg ginger, 250 mg CurQfen curcumin-fenugreek (35% curcuminoids), 250 mg boswellia, 200 mg white willow extract, 150 mg hops, 60 mg devil's claw

3 capsules once daily
with food

Resolution support
PRMs from fish oil, the body's finish-up signals

PRM Resolve
60 or 120 softgels

- Supports the body's natural resolution response ◆
- EPA and DHA omega-3s

IN EACH SERVING
Per 2 softgels: 400 mcg PRMs (pro-resolving mediators), 1,200 mg omega-3 with 580 mg EPA and 420 mg DHA

2 softgels daily
with your evening meal

Collagen support
collagen peptides for tendon, ligament, bone

Collagen Renew
525 g · about 30 scoops

- Supports healthy tendons and ligaments ◆
- Pair with a vitamin C food, like an orange

IN EACH SERVING
Per scoop: 17.5 g collagen peptides (FORTIGEL 5 g, FORTIBONE 5 g, TENDOFORTE 5 g, VERISOL 2.5 g), 15 g protein

1 scoop daily
in 8 oz of water or a drink

Muscle relaxation
magnesium, L-theanine, passion flower

Muscle Eze
90 capsules

- Helps relax muscle tissue ◆
- Supports calmness at bedtime ◆

IN EACH SERVING
Per 3 capsules: 200 mg magnesium (citrate), 100 mg calcium (lactate), 50 mg L-theanine, 40 mg passion flower

3 capsules at bedtime
may cause drowsiness

Protein support
grass-fed whey isolate, a complete protein

Whey Protein
Chocolate or vanilla

- Supports lean muscle while you move less ◆
- An easy way to get protein at a meal

IN EACH SERVING
Per scoop (32 g): 25 g protein from whey protein isolate, with 2.65 g leucine

1 scoop daily
in 8 to 10 oz of water

PHARMACIST CHECK

Keep taking your medicines.

- **Bleeding problem or blood thinner (warfarin, apixaban, clopidogrel), aspirin, or NSAIDs like ibuprofen or naproxen?** White willow (salicin), ginger, curcumin, devil's claw and fish oil may add to bleeding risk. Ask your pharmacist and your prescriber.
- **Allergic to aspirin?** Skip Inflam-Eze Plus: white willow contains salicin, a natural relative of aspirin.
- **Surgery coming up, or just had one?** Tell your surgeon about every supplement and ask when to stop and restart. Many ask you to stop herbs and fish oil 2 weeks before surgery.
- **Muscle relaxers, opioids or sleep aids?** Muscle Eze and the hops in Inflam-Eze Plus may add drowsiness. **Diabetes medicine?** The ginger and curcumin in Inflam-Eze Plus may lower blood sugar; ask your pharmacist about checking it.
- **Antibiotics or thyroid medicine?** Calcium and magnesium in Muscle Eze can block some of them; ask your pharmacist how to space them.
- **Pregnant, nursing, under 18, allergic to fish, shellfish or milk, or have liver or kidney disease, stomach ulcers or gallstones?** Ask your pharmacist first.

YOUR DAILY RHYTHM

Morning
Inflam-Eze Plus 3 capsules
Collagen Renew 1 scoop

Evening meal
PRM Resolve 2 softgels
Whey Protein 1 scoop

Bedtime
Muscle Eze 3 capsules

The full plan is **8 pills and 2 scoops a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.
