Patient name _____ Date _____

# Intestinal Permeability

## Your gut barrier, and why it leaks

Your gut lining is a wall just one cell thick, sealed at the seams by **tight junctions**. A healthy lining lets nutrients through and keeps out undigested food, microbes and the toxins they make. Poor diet, infections, alcohol, some medications and stress can loosen those seams. Researchers call this **increased intestinal permeability**; you may know it as leaky gut. The good news: the lining renews itself every few days, and food and daily habits help it stay strong.

**HEALTHY BARRIER**

Seams sealed. Nutrients pass through the cells.

**LEAKY BARRIER**

Inflammation: seams loosen, gaps open. Food, microbes and toxins leak in.

**KEY** Top: inside your gut · Middle: the lining and the tissue under it · Bottom: your blood

**Each letter is a nutrient your gut absorbs:** C vitamin C · Fe iron · Zn zinc · Mg magnesium · D vitamin D · B B vitamins · Ca calcium

- **Food particle** not fully digested
- **Microbe** germs like bacteria
- **Toxin** made by microbes
- **Medication** like ibuprofen
- **Stress signal** stress hormones
- **Red blood cell** carries oxygen
- **Microvilli** tiny fingers soak up nutrients
- **Absorbed** through a cell
- **Leak** through a gap
- **Tight junction** seals the seam
- **Torn junction** seam torn open
- **Inflammation** red, swollen cells

## When the barrier leaks, you may notice

### Food reactions
Bloating or other symptoms after foods such as gluten, dairy or soy

### Immune reactions
Allergies and flare-ups of eczema (itchy, red skin)

### Poor absorption
Damaged cells absorb less iron, zinc or vitamin D, so you may tire

Researchers are also studying how a leaky barrier connects to **autoimmune conditions** such as Hashimoto's thyroiditis, rheumatoid arthritis and lupus. If you live with one, tell your pharmacist and your doctor about any gut symptoms.

# Lifestyle Modifications

From NutriDyn's 5R gut plan: Replace, Repair, Reinoculate and Retain here; Remove's herbs are on the Gut Overgrowth sheet.

- [ ] **Days 1 to 10: take a break from triggers**
  - ○ Gluten, dairy and soy
  - ○ Sugar, artificial sweeteners and alcohol
  - ○ Ultra-processed food and drinks
- [ ] **Days 11 to 24: bring foods back one at a time**
  - ○ Gluten, then dairy, then sugar: 1 serving a day for 3 days
  - ○ Keep alcohol, coffee and spicy food out
  - ○ A reaction? Stop that food and tell your care team
- [ ] **Eat to feed the lining**
  - ○ 5 or more fruits and vegetables a day, 1 leafy green
  - ○ Good-quality protein and healthy fats
  - ○ 1 fermented food a day: sauerkraut, kimchi or kombucha
- [ ] **Ease the load on the lining**
  - ○ Ask before regular ibuprofen or naproxen
  - ○ Eat slowly and calmly; nothing 2 hours before bed
  - ○ Move 30 minutes, 5 days a week; 10 calm minutes daily

# Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

## Digest food fully

**REPLACE** betaine HCl, pepsin, ox bile, enzymes

**Digestive Complete**
60 or 180 capsules

- Supports protein, fat and starch digestion ◆
- Take with meals, never on an empty stomach

**IN EACH SERVING**
Per 2 capsules: 600 mg betaine HCl, 80 mg pepsin, 350 mg ox bile and pancreatic enzymes (from pork)

**2 capsules**
with each meal, days 1 to 10

## START HERE — Nourish the lining

**REPAIR** L-glutamine, zinc carnosine, DGL, aloe

**GI Integrity**
Peach Tea, Berry, Chocolate

- Nourishes the cells that line your gut ◆
- Soothes and coats the lining ◆

**IN EACH SERVING**
3 g L-glutamine, 1 g glucosamine HCl, 400 mg DGL licorice, 300 mg aloe, 200 mg slippery elm, 16.1 mg zinc (as zinc carnosine)

**1 scoop twice daily**
days 1 to 10, in water

## Bind and protect

**REPAIR** serum-derived bovine immunoglobulins

**GI Defend**
75 g powder

- Supports a healthy gut immune system ◆
- Supports healthy gut barrier function ◆

**IN EACH SERVING**
2.5 g ImmunoLin (serum-derived bovine immunoglobulin isolate), from beef serum, not milk

**1 scoop twice daily**
days 1 to 10, with GI Integrity

## Add friendly microbes

**REINOCULATE** 7 strains with S. boulardii

**UltraBiotic Daily Multi-Strain**
30 or 60 capsules

- Supports a balanced gut microbiome ◆
- 2 hours from antibiotics

**IN EACH SERVING**
30 billion CFU at manufacture, 7 strains, including S. boulardii (5 billion), L. acidophilus and B. lactis

**1 capsule daily**
at bedtime, days 1 to 10

## Keep the gains

**RETAIN** gut-support shake for days 11 to 24

**GI Restore**
Vanilla or Chocolate

- Supports the gut barrier and its mucus layer ◆
- Feeds your friendly bacteria ◆

**IN EACH SERVING**
12 g protein, 2.5 g L-glutamine, prebiotics (2.5 g arabinogalactan, 2 g 2′-FL), 500 mg quercetin, 300 mg turmeric, 18.75 mg zinc

**1 scoop twice daily**
days 11 to 24, in water

## YOUR DAILY RHYTHM

**Morning**
Digestive Complete 2 capsules
GI Integrity 1 scoop
GI Defend 1 scoop, mixed in
GI Restore 1 scoop from day 11

**Evening meal**
Digestive Complete 2 capsules
GI Integrity 1 scoop
GI Defend 1 scoop, mixed in
GI Restore 1 scoop from day 11

**Bedtime**
UltraBiotic Daily Multi-Strain
1 capsule

Days 1 to 10: **7 pills and 4 scoops a day**, the first four products together; Digestive Complete with all three meals. Days 11 to 24: only GI Restore, 1 scoop twice a day.

## PHARMACIST CHECK

**Keep taking your medicines.**

- **Ulcer, now or ever?** Skip Digestive Complete. Ask first with gastritis, acid blockers, NSAIDs or steroids.
- **Zinc, iron and calcium** in the shakes bind quinolone and tetracycline antibiotics: take those 2 hours before or 6 after.
- **Probiotic:** antifungals stop its S. boulardii; not with a central IV line or weak immunity.
- **Pregnant or nursing?** Skip GI Integrity; ask before the others. **Celiac test?** Do it before you stop gluten.
- **Blood thinner?** Ask first (glucosamine, turmeric). **Alpha-gal?** Skip Digestive Complete and GI Defend (pork, beef). **Smoker or ex-smoker?** Ask before GI Restore (high in beta-carotene).

**Special considerations for you:**
