Patient name _____ Date _____

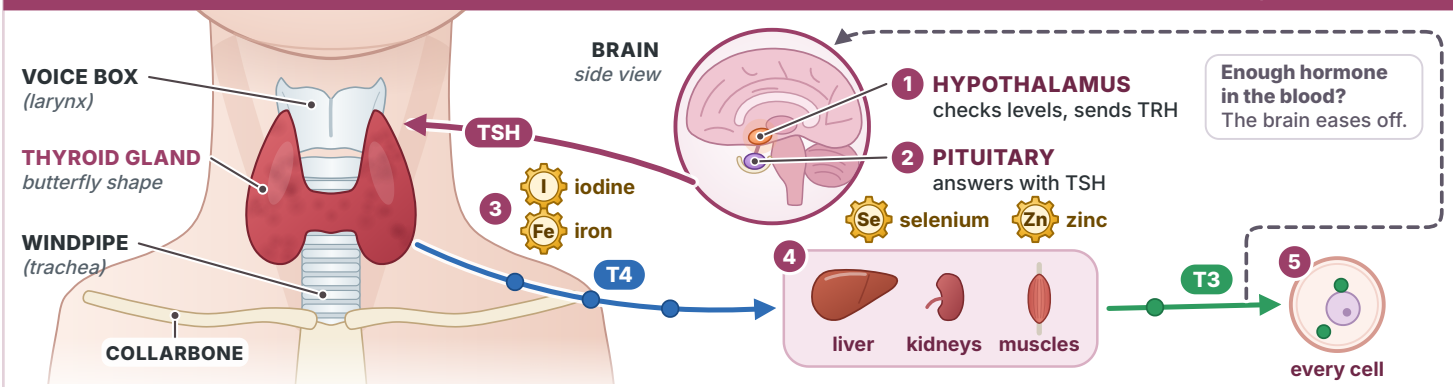

Thyroid Health

Underactive thyroid and Hashimoto's

Your **thyroid**, a butterfly-shaped gland in your neck, sets the pace of nearly every cell. Too little hormone slows the body down: an **underactive thyroid** (hypothyroidism). In the U.S. the usual cause is **Hashimoto's**, an immune attack on the gland.

HOW YOUR THYROID WORKS

a feedback loop, like a thermostat

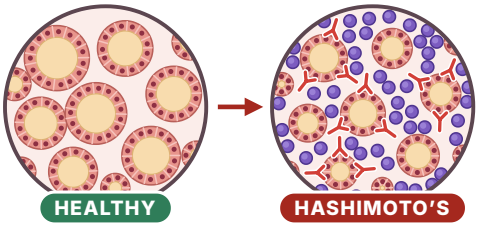

1. **Hypothalamus:** checks levels, sends TRH to the pituitary.
2. **Pituitary:** answers with TSH, the "make more" signal.
3. **Thyroid:** uses iodine and iron to make T4 (and a little T3).
4. **Liver, kidneys, muscles:** turn T4 into active T3.
5. **Every cell:** T3 sets your energy, warmth and heartbeat.

↻ **Feedback:** when levels are right, the brain eases off.

KEY ● T4, storage form ● T3, active form → TSH signal (from the pituitary) - - → Feedback Se A nutrient that step needs

HASHIMOTO'S: THE IMMUNE SYSTEM TURNS ON THE THYROID

thyroid tissue, magnified

1. Immune cells mistake the thyroid for a threat.
2. They move in, and antibodies tag TPO, the gland's hormone-making enzyme.
3. Over months or years, the gland makes less hormone.
4. The pituitary pushes harder, so TSH rises. On a routine blood test, this is usually the first sign.

Linked to Hashimoto's: excess iodine (kelp, iodine drops).
Worth checking: your iron and vitamin D levels.

KEY
- Thyroid cells
- Stored hormone
- Immune cell
- TPO antibody

USUAL TREATMENT
Levothyroxine pills replace the missing hormone.

Signs of an underactive thyroid

Slow to show. Up to 1 in 10 Americans has a slow thyroid, treated or not. It can raise cholesterol.

Tired, low energy · Always cold · Weight gain · Dry skin, thinning hair · Constipation · Foggy thinking, low mood · Heavy or irregular periods · Slow heartbeat

Higher risk: women (5 to 8 times more likely than men), age 60 or older, a family history, type 1 diabetes, celiac or another autoimmune disease, a baby in the past 6 months, thyroid surgery, radioactive iodine, radiation to the neck or chest, and some medicines (lithium, amiodarone).

Know your numbers

Write your results in the boxes, then go over them with the provider who ordered them.

TSH the "make more" signal, mIU/L

Below 0.45	0.45 to 4.5	Above 4.5	My result
may be overactive, or too much medicine	a common normal range; lower in pregnancy	may be underactive: the brain pushes harder	

BEFORE ANY THYROID BLOOD TEST
Stop **biotin** (in Essential Multi, many multis and hair, skin and nail formulas) 2 to 3 days ahead. It can make results look falsely high or low.

Free T4	TPO antibodies	Ferritin	Vitamin D
the main thyroid hormone	positive: a sign of Hashimoto's	your iron stores **low: under 30 ng/mL**	25-hydroxy vitamin D **low: under 20 ng/mL**

Lifestyle Recommendations

Whole-food plate
Fish, eggs, beans, nuts and seeds bring selenium, zinc and iron.

Go easy on iodine
No kelp or iodine drops. Iodized salt or a multi (150 mcg) is plenty.

Move most days
Walk most days. Add strength work 2 to 3 days a week.

Sleep 7 to 9 hours
Steady sleep helps energy, mood and weight.

Ask about celiac
More common with thyroid disease. Test before you cut gluten.

Same time daily
Take thyroid medicine the same way each day, with water only.

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

START HERE

Thyroid nutrient base
selenium, zinc and more

Essential Multi
90 capsules · 30 servings

- Selenium and zinc support thyroid health ◆
- Iodine at a normal dose (150 mcg)

IN EACH SERVING
Per 3 capsules: 100 mcg selenium, 15 mg zinc, 150 mcg iodine, 1,000 IU D3, 500 mcg biotin, 120 mcg vitamin K; no iron

3 capsules with dinner
4 hours after thyroid meds

Vitamin D
only if your level is low

D3 5000 with K2
60 softgels

- Supports healthy immune function ◆
- K2 helps put calcium to work in bone ◆

IN EACH SERVING
5,000 IU (125 mcg) vitamin D3, 60 mcg vitamin K2 (MK-7), 15 mcg vitamin K1

1 softgel with dinner
short term; recheck D levels

Iron
only if ferritin is low

Iron Support
180 capsules

- Supports healthy iron levels and energy ◆
- Iron supports TPO, the thyroid's hormone-making enzyme ◆

IN EACH SERVING
29 mg iron (bisglycinate), 80 mg vitamin C, 350 mcg B12, 1,020 mcg DFE folate, 5 mg B6, 1 mg copper

1 capsule at bedtime
4 hours from thyroid meds

Gut balance
for steady digestion

UltraBiotic Daily Multi-Strain
30 or 60 capsules

- Supports a healthy gut microbiome ◆
- Supports regular, comfortable digestion ◆

IN EACH SERVING
30 billion CFU when made: S. boulardii, L. reuteri, B. lactis, L. plantarum, L. acidophilus, L. gasseri, Bacillus coagulans

1 capsule with breakfast
after your thyroid medicine

Omega-3s
for heart health

Omega Pure EPA-DHA 1000
120 softgels

- Supports a healthy inflammatory response ◆
- Supports heart health and healthy triglycerides ◆

IN EACH SERVING
1,000 mg EPA + DHA per softgel (730 mg EPA, 270 mg DHA)

1 softgel with dinner
same meal as the multi

YOUR DAILY RHYTHM

Morning
UltraBiotic Daily Multi-Strain
1 capsule

Evening meal
Essential Multi
3 capsules
D3 5000 with K2
1 softgel, if D is low
Omega Pure EPA-DHA 1000
1 softgel

Bedtime
Iron Support
1 capsule, if ferritin is low

The full plan is **7 pills a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

PHARMACIST CHECK

Keep taking your medicines.

- **Thyroid medicine alone:** water, empty stomach, 30 to 60 minutes before breakfast. Iron, calcium, magnesium, antacids and multis 4 hours later. Bedtime dose? Ask your pharmacist to re-time them.
- **Biotin can throw off thyroid labs.** It is in many multis (Essential Multi too) and hair, skin and nail formulas. Stop it 2 to 3 days before a blood test.
- **D3 5000 and Iron Support need a low lab first.** With the multi, D3 is 6,000 IU a day, over the 4,000 IU upper limit: recheck it.
- **On warfarin or another blood thinner?** Skip D3 5000 with K2 (its label says so); ask your pharmacist about plain D3 5000 and the multi's vitamin K.
- **Never change your thyroid dose on your own.** Glandular thyroid products can hold real hormone. **Pregnant or planning?** Tell your prescriber right away: the dose usually goes up, and iodine needs rise.
