Patient name _____ Date _____

High Blood Pressure

No symptoms, real risk

Nearly **half of U.S. adults** have high blood pressure, and about **4 in 10** of them do not know it, because it rarely causes symptoms. Over the years, the extra force strains the heart, kidneys, brain and eyes and raises the risk of heart attack and stroke. One signal you can influence is **nitric oxide (NO)**, which tells blood-vessel walls to relax. What you eat, how you move, how you sleep and how you handle stress all change how much of it your body makes.

1. **Eat greens and beets**
   They are rich in nitrate, a building block for NO.
2. **Mouth bacteria help**
   Friendly tongue bacteria turn nitrate into nitrite.
3. **Your body makes NO**
   Nitrite becomes nitric oxide in your blood and tissues.
4. **NO relaxes vessel walls**
   Vessels widen and blood flows with less pressure.

RISK FACTORS

- Extra weight
- High-sodium, processed food
- Sitting most of the day
- Too much alcohol
- Smoking
- Chronic stress
- Poor sleep or sleep apnea
- Diabetes
- Kidney disease
- Birth control pills, or high BP in a past pregnancy
- Family history
- Increasing age

READING YOUR NUMBERS

118 / **76**

Systolic (top number): the push on artery walls when your heart beats.

Diastolic (bottom number): the push between beats, while your heart rests.

MEASURE IT RIGHT

- ✓ No caffeine, smoking or exercise for 30 minutes. Rest 5 minutes first.
- ✓ Sit back supported, feet flat, legs uncrossed, arm at heart level.
- ✓ Cuff on bare skin. Take 2 readings, 1 minute apart. Write them down.
- ✓ Ask your provider to check your cuff size.

Reading ____ / ____ **Goal** ____ / ____

WHAT THE NUMBERS MEAN

Category	Top number		Bottom number
Normal	**under 120**	and	**under 80**
Elevated	**120 to 129**	and	**under 80**
Stage 1 high	**130 to 139**	or	**80 to 89**
Stage 2 high	**140 or more**	or	**90 or more**
Severe	**over 180**	and/or	**over 120**

Over 180/120 with chest or back pain, shortness of breath, numbness, weakness, or trouble seeing or speaking? **Call 911 now.** No symptoms? Wait 5 minutes and check again. Still that high: call your doctor right away.

Some medicines raise blood pressure, like decongestants in cold remedies and pain relievers such as ibuprofen and naproxen. Ask your provider first.

Categories in mm Hg: 2025 AHA/ACC high blood pressure guideline (same cutoffs as 2017).

Lifestyle Recommendations

Make nitric oxide
Greens, beets and fruit daily. Skip antiseptic mouthwash unless your dentist prescribed it.

Cut the sodium
Under 2,300 mg a day; 1,500 is better. Most comes from packaged and restaurant food.

Lighten the load
Losing even 5 to 10 pounds can help lower your numbers.

Move, then hold
Walk 30 minutes most days. Under 160/100? Add wall sits or hand grips; breathe normally.

Sleep, breathe
Sleep 7 to 9 hours; breathe slowly a few minutes a day. Snoring? Ask about a sleep test.

Quit, cut back
Quit smoking: it tightens vessels. Drink less alcohol; none is best.

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

START HERE

Healthy pressure
olive leaf, garlic, celery, grape

Cardio Essentials BP Support
90 capsules · 30 servings

- Supports healthy blood pressure already in the normal range ◆
- Helps make nitric oxide ◆

IN EACH SERVING
Per 3 capsules: 750 mg olive leaf, 750 mg black garlic, 300 mg celery seed, 200 mg grape seed (all extracts)

3 capsules daily
with your evening meal

Boost nitric oxide
beet root and potassium nitrate

Nitric Boost
90 capsules · 30 servings

- Helps make nitric oxide ◆
- Supports healthy blood flow ◆

IN EACH SERVING
Per 3 capsules: 375 mg beet root extract, potassium nitrate (150 mg potassium), 120 mg magnesium, 300 mg vitamin C, 100 mg B1, plus D3, B12, zinc, pomegranate, tart cherry, pine bark and grape seed

3 capsules daily
with breakfast

Healthy vessels
magnesium

Magnesium Glycinate
60 to 320 capsules

- Supports healthy blood vessels ◆
- Ask about your magnesium level

IN EACH SERVING
Per 2 capsules: 260 mg magnesium. Nitric Boost adds 120 mg, so take just 1.

1 capsule at bedtime
2 if you skip Nitric Boost

Heart-healthy fats
EPA and DHA omega-3s

Omega Pure EPA-DHA 1000
120 softgels

- Supports heart and vessel health ◆
- Supports healthy cell membranes ◆

IN EACH SERVING
Per softgel: 1,000 mg EPA + DHA (730 mg EPA, 270 mg DHA)

1 softgel twice daily
at breakfast and dinner

Power the heart
coenzyme Q10

CoQ10 100 mg
60 softgels

- Statins can lower your CoQ10
- Fuel for heart cells ◆

IN EACH SERVING
Per softgel: 100 mg CoQ10, 67 mg vitamin E, 698 mcg RAE vitamin A (as beta-carotene)

1 softgel daily
with your evening meal

YOUR DAILY RHYTHM

Morning
Nitric Boost 3 capsules
Omega Pure EPA-DHA 1000 1 softgel

Evening meal
Cardio Essentials BP Support 3 capsules
Omega Pure EPA-DHA 1000 1 softgel
CoQ10 100 mg 1 softgel

Bedtime
Magnesium Glycinate 1 capsule

The full plan is **10 pills a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

PROVIDER CHECK

Keep taking your medicines.

- **Water pills** (HCTZ, furosemide) can drain magnesium and potassium; **statins** lower CoQ10. Ask about a blood test. **Fish allergy?** Skip Omega Pure.
- **Kidney disease, an ACE inhibitor (like lisinopril), ARB (like losartan) or spironolactone?** Potassium can build up: skip salt substitutes, and ask your provider before magnesium or Nitric Boost (150 mg potassium).
- **BP pills, nitroglycerin or ED pills?** Show your provider and your prescriber this sheet first: doses may need a check. Never stop a medicine on your own.
- **Diabetes medicine?** Olive leaf can lower blood sugar; check it more often.
- **Blood thinner?** Garlic, fish oil, grape seed, pine bark, pomegranate, vitamin E and CoQ10 can change it: ask your provider (on warfarin, get an INR clotting test).
- **Thyroid or bone (alendronate) pills?** 4 hours apart from magnesium and Nitric Boost; **antibiotics:** ask your provider. **Pregnant or nursing?** Ask first.
