Patient name _____ Date _____

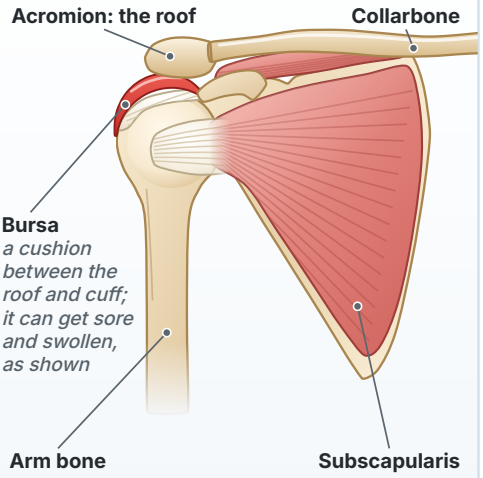

Shoulder and Tendon Pain

Rotator cuff, tennis elbow and Achilles

Tendons are tough cords of **collagen** that join muscle to bone. Most tendon pain builds slowly, when a tendon does more than it is ready for and its rope-like fibers fray. Shoulder pain is the **third most common** muscle and joint reason to see a family doctor, usually from the **rotator cuff**: 4 muscles whose tendons hug the ball of the arm bone and keep it in its socket. The **supraspinatus** helps lift your arm. The other three turn it in and out.

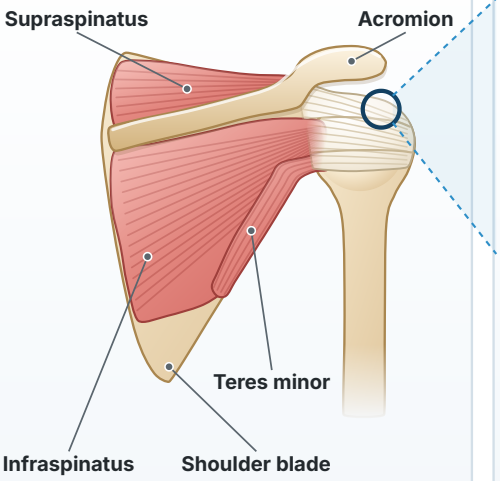

ROTATOR CUFF FROM THE FRONT

big outer shoulder muscle lifted away

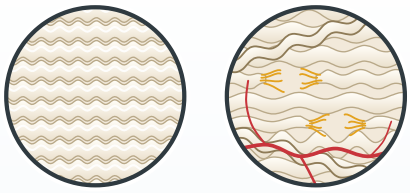

ROTATOR CUFF FROM THE BACK

big outer shoulder muscle lifted away

INSIDE A TENDON

the circled spot, magnified many times

HEALTHY
Neat, parallel collagen fibers

OVERLOADED
Frayed, tangled fibers; new blood vessels

HOW TENDONS GET STRONGER

Load it exercise is the signal → **Feed it** protein and vitamin C foods → **Sleep on it** 7 to 9 hours a night

KEY Muscle · Tendon · Bone · Sore bursa · Collagen fibers · Frayed fibers · New blood vessels

WHERE TENDON PAIN SHOWS UP

where it usually hurts

Shoulder *rotator cuff*
- Ache on the outer upper arm
- Worse when you lift your arm
- Hurts to lie on it at night

Elbow *tennis elbow*
- Pain on the outer elbow bump
- Worse when you grip or twist
- Common with gripping work

Ankle *Achilles tendon*
- Pain just above the heel bone
- Stiff in the morning
- Sore with running or jumping

WHAT RAISES YOUR RISK

- Age over 50
- Overhead work or sports
- A sudden jump in training
- Diabetes
- High cholesterol
- Smoking
- Family history
- Some antibiotics and steroids

YOUR PAIN GUIDE DURING EXERCISE

0 = no pain, 10 = the worst pain

0	1	2	3	4	5	6	7	8	9	10

0 to 2: safe
Keep going.

3 to 5: OK
if it settles by the next morning.

6 or more: too much
Stop or go lighter now, and do less next time.

12 **weeks** is a typical length for a tendon exercise plan. Tendons rebuild slowly, and the gains last.

⚠ **Get checked right away for:** a pop or sudden weakness after a fall or heavy lift. An arm you cannot lift. A hot, red, swollen joint, or a fever. Numbness running down the arm. A pop at the back of the ankle, or not being able to stand on tiptoe on that foot. **Shoulder or arm pain with chest pressure, shortness of breath or a cold sweat can be a heart attack: call 911.**

Lifestyle Recommendations

Habits that help tendons rebuild

Load, don't rest
Exercise most days. Full rest weakens tendons.

Build up slowly
Add weight, miles or reps in small steps.

Lower your reach
Keep heavy lifting below shoulder height.

Feed the rebuild
Eat protein and foods rich in vitamin C.

Sleep 7 to 9 hours
Your repair hormone peaks in deep sleep.

Stop smoking
Smoking is tied to more rotator cuff tears.

Nutrient Solutions

What your body needs, and the NutriDyn formula that delivers it

START HERE

Tendon building blocks
collagen peptides

Collagen Renew
525 g · about 30 scoops

- Supports tendons, ligaments and joints ◆
- Includes TENDOFORTE collagen peptides

IN EACH SERVING
17.5 g collagen peptides: TENDOFORTE, FORTIGEL and FORTIBONE 5 g each, VERISOL 2.5 g

1 scoop in 8 oz water
about 1 hour before exercise, any time on rest days

Build collagen
vitamin C

Vitamin C 1000
100 capsules

- Your body needs it to build collagen ◆
- Collagen Renew has none, so pair them

IN EACH SERVING
1,000 mg vitamin C (as ascorbic acid) per capsule

1 capsule daily
with your collagen

Comfort after activity
ginger, curcumin, boswellia

Inflam-Eze Plus
90 or 180 capsules

- Supports joint and muscle comfort ◆
- Supports a healthy inflammatory response ◆

IN EACH SERVING
Per 3 capsules: ginger 800 mg, CurQfen curcumin-fenugreek 250 mg, boswellia 250 mg, white willow 200 mg, hops 150 mg, devil's claw 60 mg

3 capsules daily
with food

Inflammatory balance
omega-3s EPA and DHA

Omega Pure EPA-DHA 1000
120 softgels

- Supports a balanced inflammatory response ◆
- Supports muscle, joint and heart health ◆

IN EACH SERVING
1,000 mg EPA + DHA per softgel (730 mg EPA, 270 mg DHA)

1 softgel twice daily
with meals

Muscle and bone
vitamin D3 with K2

D3 5000 with K2
60 softgels

- Supports muscle and bone health ◆
- High dose: check your vitamin D level first

IN EACH SERVING
5,000 IU (125 mcg) vitamin D3, 60 mcg vitamin K2 (MK-7), 15 mcg vitamin K1

1 softgel daily
with your evening meal

YOUR DAILY RHYTHM

Morning
Collagen Renew
1 scoop, or before exercise
Vitamin C 1000
1 capsule, with the scoop
Omega Pure EPA-DHA 1000
1 softgel

Evening meal
Inflam-Eze Plus 3 capsules
Omega Pure EPA-DHA 1000
1 softgel
D3 5000 with K2 1 softgel

The full plan is **7 pills and 1 scoop a day**. Overwhelmed? Start with the **Start here** pick, then add one product a week.

PROVIDER CHECK

Keep taking your medicines.

- **Blood thinner, aspirin, ibuprofen, naproxen, or surgery soon?** Fish oil and the Inflam-Eze Plus herbs can add to bleeding; many surgeons stop them 2 weeks before. D3 5000 with K2's vitamin K affects warfarin. Ask your provider first.
- **Fluoroquinolone antibiotics** (ciprofloxacin, levofloxacin) can injure tendons, more so after 60 or on steroids. Stop and call your doctor if a tendon hurts.
- **Allergic to aspirin, red meat (alpha-gal) or fish?** Skip Inflam-Eze Plus (willow, aspirin's cousin), Collagen Renew (beef) or Omega Pure (fish oil, gelatin shell).
- **Diabetes medicine?** Ask your provider: Inflam-Eze Plus may lower blood sugar. **Yellow skin or eyes, or dark urine?** Stop Inflam-Eze Plus and call your doctor.
- **Under 18, pregnant or nursing? On sleep aids or other medicines? Stomach ulcer, gallstones, or liver or kidney disease?** Ask your provider first.
